

Fig. 4. Results from Experiment 2: box-and-whiskers plots showing confidence in each judgment type, split by test-result condition (columns) and exhaustiveness manipulation (rows). Long horizontal lines indicate means, and short horizontal lines indicate medians. The bottom and top edges of each box indicate the 25th and 75th percentiles, respectively. Whiskers extend 1.5 times the interquartile range from the 25th and 75th percentiles. Outliers are represented by black circles.
